Trishna Bapna

B.Tech Student, Artificial Intelligence & Data Science

Email: trishna26ai@student.pillai.edu.in **GitHub:** github.com/TrishnaBapna **College:** Pillai University, New Panvel

Applying for: MES Department of Computer Engineering, Winter Internship Programme 2026

PROFESSIONAL SUMMARY

First-year B.Tech student in Artificial Intelligence and Data Science, aspiring to work in software engineering, full stack web development, artificial intelligence and generative AI, with a focus on building practical software solutions. Hands-on exposure to AI-assisted software development through two real-world projects in healthcare and educational technology, actively improving programming fundamentals and technical understanding. Seeking a winter internship to learn under structured guidance and strengthen core engineering skills.

EDUCATION

Bachelor of Technology (B.Tech) in AI & Data Science 2026 – Present

Pillai University, New Panvel • First Year (2026–27)

PROJECTS (AI-ASSISTED DEVELOPMENT)

SAKSHAM 3.0 | Healthcare Technology / Assistive Software Live Demo • GitHub

- Software-based assistive healthcare ecosystem focused on patient needs, personalized support and digital care, designed for Parkinson's patients, caregivers, and attending doctors.
- Implemented patient-focused features including a voice-first, multilingual interface with large, tremor-friendly controls, daily routine support, and distinct caregiver and doctor views.
- Engineered as a Progressive Web App (PWA) with Supabase (PostgreSQL) backend and offline-first local synchronization.
- Developed with an AI-assisted workflow, iterating on UX and motor-assistive features to improve accessibility.

FOCUSMATE | Student Productivity / EdTech Live Demo • Active Development

- Student productivity application built with an AI-assisted coding workflow using React, TypeScript, Firebase and Firestore.
- Implemented features include a focus timer (Pomodoro & stopwatch) with session tracking and study analytics, subjects with daily goals and progress, and tasks with exam countdowns.
- Engineered notes linked to subjects (typed, handwritten, voice, and scanned), plus AI-assisted learning tools including summaries, quizzes, and flashcards.

TECHNICAL SKILLS

Development Tools:	Google Antigravity, Visual Studio Code, Git, GitHub
Applied in Projects:	React, JavaScript, TypeScript, Firebase, Firestore, HTML5, CSS3, Supabase
Currently Learning:	Python programming, JavaScript fundamentals, React development, TypeScript, backend development, AI and LLM concepts

** Note: Project technologies above were applied with AI assistance; actively building independent programming proficiency.*

CERTIFICATIONS

KLiC Python Certification MKCL / KLiC Academy
